## FOREWORD

"The impact of research on society is so great that it brings intellectual changes to dispel the old beliefs, technical changes, changes in social organization and finally helps in exploiting nature".

Bertrand Russell

Research is the gateway to the development of mankind in all spheres of human activities. It is a vital force for the progress of a nation. From ancient days Indian universities with the support of their libraries were well recognized as important centres for research. "Kothari Commission (1964-1966) stressed that the library should provide resources necessary for research in fields of special interest to the university and to aid the university teacher in keeping abreast of developments in his own field".

University of Hyderabad, since its inception focused on research and achieved several distinctions in India for its contribution to scientific as well as humanistic research. The library too, by taking advantages of ICT developments, is providing necessary resources in electronic and print media for the advancement of research in the University.

The compilation of theses submitted to the university by students in various disciplines from 1981 to 2012 is a unique contribution of the library. This volume not only helps the research scholars to select their research topics in their respective areas but also avoids duplication of research and wastage of expenditure. The objective is also to stimulate the thinking of prospective scholars so that their research can be crafted in promising ways in related yet new and emerging areas. Further, this compilation enables the library to contribute scanned copies of theses to the **Shodhganga** project of **INFLIBNET**.

I appreciate the efforts of Dr. Y. Nagi Reddy, Librarian, Dr. N. Bhaskar Rao, Documentation Officer and other library staff who were directly or indirectly involved in bringing out this most useful volume to the faculty and research scholars. I hope the research supervisors and the students can benefit immensely by referring this volume to select their research topics easily.

  
Ram Ramaswamy

## PREFACE

The handbook "PH.D THESES 1981-2012" submitted to University of Hyderabad by the students is intended to provide the faculty and the research scholars the latest developments in their disciplines. Further this compilation will help the research guides and scholars to select their research topics easily by referring this volume. From 1981-2012, a total number of 1575 Doctoral degrees were awarded in 24 disciplines of the University. Out of 1575 degrees, Chemistry occupied the first place with 294 degrees and Folk Culture Studies stood at the bottom with 4 degrees. Similarly, the highest number 118 degrees were awarded in 2008 and the least only 1 in 1986.
