Our Motto

सा विद्या या विमुक्तये

forms part of a verse appearing in
Vishnu-Purana (1.19.41)

The whole verse reads as follows :

तत्कर्म यन्न बन्धाय
सा विद्या या विमुक्तये ।
आयासायापरं कर्म
विद्यान्या शिल्पनैपुणम् ॥

The verse also occurs in the anthology of subhasitas entitled "Sarangadharapaddhati" (No.4396). In this latter work, the source of the verse is given as Vasisthat. The verse obviously possesses an ethical-spiritual import and may be translated as follows:

“That is (right) action which does not conduce to bondage (Karmabandha in the Bhagavadgita sense); that is (true) knowledge which conduces to final liberation or spiritual emancipation; (any) other knowledge implies mere skill in craft

“ बन्धन का कारण न हो, वही कर्म है और मोक्ष को सिद्ध करने वाली हो, वही विद्या है। इससे भिन्न कर्म व्यर्थ परिश्रम रूप और भिन्न विद्याएँ केवल कला-कौशल रूप ही हैं ॥”

From the Vice-Chancellor's Desk

It is a pleasure to present the Annual Report of the University and its growth and development during the year 2019-2020. This Report reflects the sustained pace of growth and development of the University during the said year. The University of Hyderabad (UoH) has been ranked sixth best among the Universities in the country by the National Institutional Ranking Framework (NIRF) of Ministry of Education for the year 2020. We are among the top institutions in the Country by various ranking agencies both in India and Abroad. To leverage the category-I Graded Autonomy conferred by the University Grants Commission (UGC) in order to take the institution to the next level of academic excellence, while adhering to its core values of equity, social justice, and affordable higher education for the needy. It sees Graded Autonomy as an opportunity to emphasize and reinforce the University's commitment to public education. We have been conferred with the Prestigious Institution of Eminence status by the Government of India. Though these are encouraging indicators, our goal is to compete with Global Institutions and prepare our students to be academically brilliant and responsible citizens.

Our University matches global standards, possible with consistently good quality of research and teaching. In the QS Rankings we are presently in the range (651-700). We are now in the top Universities in the World in overall category and among the top 150 which are the fastest growing under the age of 50. The University is the only Central University in the list of top 10 Institutes of National Importance and ranked first among the central universities by the Atal Ranking of Institutions on Innovation Achievements (ARIIA) 2020. The ranking surveys by – India Today, The Week, Careers360 (Outlook group), QS World Rankings, Nature Index, to name a few have helped UoH to retain a high ranking in India with specific references to academics, research, publications, patents, student achievements, placements and outreach.

The student strength in various disciplines this year stood at 5323, out of which over 32.46% are research scholars pursuing Ph.D. and M. Phil. / M. Tech. programmes. Women students constitute 41.16% of the total strength. 27.18% of the students are from reserved (SC/ST/PH) categories and an additional 36.29% are from the OBC category. In addition, more than 745 students were enrolled in 14 P.G. Diploma courses.

The Study in India Programme (SIP) of the University provides an opportunity for foreign students to experience and study not only the various aspects of Indian society, history and culture but also sciences and information technology, and it, in the process, creates an international environment on the University campus. The Programme emphasizes heritage, continuity and change in India. Under the SIP, a number of interdisciplinary courses are offered to participants from North American and European universities.

The University of Hyderabad can rightly boast of a highly qualified and internationally renowned faculty. Our faculty, numbering over 427, produced over 980 research publications including 176 books, during the year. They also contributed to the award of 263 Ph.D., 101 M.Phil. 102 M. Tech. and 1029 postgraduate degrees. As on date our faculty are handling research projects worth of above 290 crores funding from various national and international agencies, of which 90 projects worth of 62.53 crores were received during this financial year (2019-20).

The University is now 47 years young and is regarded as one of the major Universities in India in the area of higher education, achieving honours and attaining standards that set a benchmark for other universities in India. It is a matter of pride for us. Our faculty have written over 1,526 books and more than 19,186 papers since inception. We are also pleased to share the news that we have filed 60 patents out of which, 25 are granted. All these have helped us achieve an eminent position of Excellence within the Central University system of our country, as indeed on the academic landscape of the nation. The National Assessment and Accreditation Council (NAAC) has reaccredited our University with an 'A' grade and CGPA of 3.72 out of 4:00 which is the highest in the third cycle of reaccreditation for any institution in the country.

In its twelve Schools of study at present, the University offers postgraduate and research programmes in several areas of the Humanities, Social Sciences, Physics, Chemistry, Life Sciences, Arts & Communication, Management, Medical Sciences, Engineering, Mathematics and Statistics, Economics and Computer and Information Sciences. There are also a large number of students under the Centre for Distance and Virtual Learning Programme through 14 PG Diploma courses. A crucial and significant new addition to the University in coming years will be the Department of Education and Education Technology that has been granted by the UGC. I hope that with the addition of this important discipline, we will be able to make progress in a crucial dimension, the intersection of instruction with technology. We need to be able to reach out to larger and larger numbers of our fellow citizens and thereby fulfill the responsibility that we all share, namely, educating the bulk of the country to create a modern nation-state.

The University Grants Commission (UGC) and the Ministry of Education (MoE), Department of Science & Technology (DST) and the Department of Biotechnology (DBT) and other funding organizations have extended their generous support to the University throughout the year, and I express my gratitude to them for their cooperation.

Our University has well-defined social goals that can only be reached by the collective work of a body such as ours, where research, teaching and scholarship are valued, nurtured and encouraged. I believe that this is a fundamental way in which a university can contribute to the overall good of the society in which we are embedded, the society out of which we grew, and the society we were destined to serve.

We are confident that with the reforms and innovations introduced at the University, we will certainly be amongst the leading universities of the world in the years to come. I take this opportunity to thank all the sections of the University fraternity - faculty, students, and the non-teaching staff, for their valuable contributions to the process of making this University an institution of academic excellence.

Pressing for Progress 2019

A first-of-its-kind science conference, titled Pressing for Progress, was held in Hyderabad from 19th to 21st September 2019. It was organised by the Indian Physics Association in partnership with the University of Hyderabad. The Local organizing committee headed by Prof. Bindu A. Bambah had Soma Sanyal (co-convenor), V.S. Ashoka, Jayeeta Lahiri, from School of Physics University of Hyderabad and Priya Hasan (maulana azad Univ.), Rajyalakshmi (TIFR, Hyd), Kanchana (IIT, Hyd), Haerjinder Singh (IIIT, Hyd.) and R. Nigam (BITS, Hyd.)

Ashutosh Sharma, Secretary of the Department of Science & Technology and Principal Scientific Adviser to the Government of India, K Vijay Raghavan, tuned in from Delhi to thank the organisers for bringing together members of the physics community for discussion on gender parity. Bimla Buti, a senior scientist who set up Institute of Plasma Research in the 80s - an offshoot from PRL, and the former Director of the International Centre for Theoretical Physics in Italy, was felicitated.

The delegates of PFP 2019 stood to benefit from three workshops on “understanding gender equity”. The panel discussion on “Gender disparity in physics: Whose problem is it?” included three men among six panellists - a gender-neutral panel! Pratibha Jolly, former Principal of Miranda House, a women’s college in New Delhi, served as the moderator.

The Hyderabad Charter for Gender Equity authored by the Indian Physics Association Gender working group chairperson Prajval Shastri and supported by S. Goswami, Prof. V. Nalal, T. Saha Dasgupta, S. Chatterjee and Resmi Lakshmi was released. It has now a 1000 signatures and serves as a document for outlining the steps to be taken to end gender disparity in physics.

Frontiers in High Energy Physics

The conference Frontiers in High Energy Physics (FHEP 2019) was held at the University of Hyderabad, Hyderabad, India, during 14–17 October, 2019, which was jointly organized by the University of Hyderabad and IIT Hyderabad. Around 130 physicists and researchers, including many from outside India, participated in FHEP 2019 to discuss the latest advancements in the fields of interest. Apart from the excellent talks by the invited speakers, there were contributed oral as well as poster presentations by the young researchers. The topics discussed in the conference are: Gravitation and Cosmology, Neutrino Physics, Dark Matter, Beyond the Standard Model and Flavour Physics. Overall it was an excellent conference appreciated by all the participants. The proceeding of the Conference has been published by Springer.

National Workshop on Network Science:

“National Workshop on Network Science NetSci 2020” was organized at School of Physics, University of Hyderabad during March 13-15, 2020 with the partial support from UGC-CAS Phase II. Network science is an interdisciplinary field of research in which the physicists are also interested in understanding the biological, technological and social networks using techniques of statistical physics and non-linear dynamics. This workshop was intended to give introductory experience for researchers wanting to get in to this area. It had 11 invited speakers from various organizations across the country, and was attended by 3 faculty members, 2 industries professional, 35 Ph.D. scholars and 5 PG students as attendees from University of Hyderabad, Pondicherry University, IISER Kolkata, IIIT Delhi, DA-IICT, University of Kashmir, Birbal Sahni Institute of Palaeo sciences, NIT Suratkal, CSIR AMPRI, Yogi Vemana University, National Brain Research Center etc. The workshop had regular lectures and also hands on sessions on many standard software tools which are used in network sciences.

4.4 School of Life Sciences

Dean : S. Dayananda

School consists of the Departments / Centres

Department of Animal Biology
Department of Biochemistry
Department of Biotechnology & Bioinformatics
Department of Plant Sciences
Department of Systems & Computational Biology

About the School

Established in 1977, The School of Life Sciences has witnessed phenomenal progress and established itself as one of the biggest and most vibrant Schools in the University system in the country. With an emphasis on interdisciplinary teaching and research, the school produces finest graduates in modern biology, biotechnology, bioinformatics and systems biology. The performance of its alumni, students together with the contributions of the faculty, placed University at number one place in research output in the recent Nature Index rankings.

The School consists of five Departments:

Department of Animal Biology
Department of Biochemistry
Department of Biotechnology & Bioinformatics
Department of Plant Sciences
Department of Systems & Computational Biology

Every year, the School receives highest number of applications in response to our admission notifications both from India and abroad. Details of academic programmes, eligibility criteria and admission process along with faculty profile can be accessed from the web page of the school (<http://sls.uohyd.ac.in>).

The School started its journey from a modest premises located at the old science complex. It has moved out to a new centrally air-conditioned building with a plinth area of 2,38,345 sft. The modern building is designed for housing a total of 65 research laboratories, class-rooms, teaching laboratories, central instrumentation facilities, cell and microbial culture facilities, seminar hall and auditorium. A state of the art animal house with mosquito breeding facility, and a fully functional and third party evaluated Biosafety Level 3 (BSL-3) facility are the recent additions to majestic School of Life Sciences building. These new additions and funding from Department of Biotechnology under DBT-Boost to University Interdisciplinary Life Science Departments for Education and Research programme (DBT-BUILDER) programme is indeed a boost to the Schools interdisciplinary research. The well-equipped laboratories, committed, trained faculty together with highly talented and motivated students contribute for establishing an excellent academic ecosystem at SLS. Under the tutelage of SLS faculty, a number of students transformed into a World Class Scientists, academic leaders and entrepreneurs. Research work done by the faculty of the school frequently appear in journals of international reputes and attracted the attention of world's best talent. resulting in establishing international collaborations. Most of the labs have won international grants and successfully participated in bilateral scientific collaborations with most of the leading nations. In recognition of their research contributions, the faculty won a number of recognitions including Millennium Plaques of Honour instituted by Indian Science Congress Association (ISCA), Shanthi Swaroop Bhatnagar Prize, given by CSIR, New Delhi. A good number of faculty are elected fellows of all three leading science academies and won coveted recognitions like JC Bose fellowships. The vision of the faculty together with hard work of the committed students, helped SLS to win institutional grants from national and international agencies. The SLS won prestigious CAS (Center for Advanced Studies) grant from University Grants Commission (UGC), New Delhi. At present most of the departments of the school are funded either by UGC-DRS or by DST-FIST schemes. The SLS is one of the few Schools under University set up to receive grants from Department of Biotechnology (DBT), New Delhi under DBT-BUILDER programme. During this academic year, SLS won 50.44 crores extramural funding from both industry and Govt. funding agencies like, CSIR, DST, SERB, DBT, MHRD and ICMR. Students of the SLS have shown impressive performance, 30 cleared UGC-CSIR-NET.

The SLS effectively used funds received from various funding agencies to create state-of-the-art teaching laboratories, centralized high-end facilities such as Real-Time PCR Machine, Fluorescence-activated Cell Sorting (FACS) Facility,

Microarray Spotter/Analyzer and Hybridization Oven, Next-Generation Sequencing System, Bioruptor, Cross Linker, Electroporator, Luminometer, Nano-Drop Machine, HPLC, FPLC and AKTA PILOT, CD Spectrophotometer, Fluorescence Spectrophotometer, Surface Plasmon Resonance, Radioactive Facility, Proteomics-MALDI/MS-MS/TOF-Q Chemidoc-Imaging System, Robotic Crystallization System LC-MS and GC-MS for Metabolomic Research, Confocal/ Fluorescence Microscope, Super Resolution Microscope, Flow Cytometry, Microtome / Ultramicrotome (Tissue Sectioning), *in vivo* Imaging for whole cell and animal imaging, Green House Facility and Bio-Safety Level Three Facility (BSL3).

In addition to these central facilities the School has access for infrastructural facilities set up at Nanotechnology Centre, Central Instrumentation Laboratory (CIL) and Centre for Modelling, Simulation and Design (CMSD), located within the campus which carry facilities such as Transmission Electron Microscope (TEM), Atomic Force Microscope (AFM) and high-end computational facilities.

SLS has been a host for a number of seminars, conferences and symposia. The School has invited several distinguished faculty and eminent scientists from across the globe under GIAN (Global Initiative on Academic Network) Programs, a flagship programme of Ministry of Human Resource & Development (MHRD). To name a few, Dr. Gyoza Garab, Biological Research Centre, Hungary, Dr. Nathan Nelson, Tel Aviv University, Israel, Prof. Barry D. Bruce, University of Tennessee, USA, Prof. Nirbhay Kumar, George Washington University USA, Dr. Geeta Bansal, National Institute of Health (NIH), USA, are among the dignitaries visited school during this academic year.

The School conducted several conferences during the year and some of the major events are GIAN Programmes Chloroplast Structure and Function, Applied Photosynthesis: Putting Nature to Work, Malaria Control Strategies: Drug Design and Vaccine Development, DST-PAC Meeting in Plant Sciences & Animal Biology, 85th Annual Meeting of the Fellows of Indian Academy of Science, Bengaluru, National conference of Frontiers in Plant Biology, Winter School on Flow Cytometry, Workshop on Data Science, Training Program on Research Methodology in Molecular Biology and Biotechnology, Dues to these intense Academic Activities and envinous infrastructure, the SLS is fondly known as 'Students Aspiration and Scholars Destination'.

4.14 Centre for Modelling Simulation and Design

The study of passage from the micro world of atoms and molecules to the macro world of solids, liquid and gases calls for an understanding of a variety of phenomena in physics, chemistry, biology, technology and related areas. Atomic lasers, molecular computers, drug-receptor interactions, industrial catalysts, lubricants, and industrially important materials form part of this continuum and an understanding of this evolution needs all the three components of research, viz. theory, experiment and computation. Computer-based simulations now form an integral part of modern research methodology and in this era of science-driven-engineering and directed basic research, the role of scientific research, based on modelling, simulation and design, is of paramount importance. The primary requisite in using the third avenue of research for solving complex problems is a working, state-of-the-art High Performance Computing Facility (HPCF) Centre.

The University of Hyderabad, having expertise in many of the above areas, fully appreciates the inter-dependence of Science, Engineering and Technology, and launched a uniquely conceived new programme of higher education and research. This initiative was launched through an imaginative programme of the UGC (recognizing the University for its Potential for excellence) by establishing a designated Centre for such activity (Centre for Modelling Simulation and Design – CMSD). This programme has been receiving generous support from DST under its FIST program.

CMSD aims to nurture cross-disciplinary bridges, which are effective in generating new knowledge and creative explorations. The human resources generated from such efforts will be invaluable. Training individuals and organizations in specific hardware and software, undertaking of consultancy and turnkey projects, help convert real life phenomena into appropriate mathematical and computational models etc., are some of the important

tasks that CMSD has embarked on. This Centre became operational from its new premises in December 2004.

One of the unique academic features of this Centre is that all the active computational scientists working in widely different academic disciplines in the University Campus are Associate Faculty of the CMSD, and contribute their expertise and experience in furthering its academic objectives. Some of the research interests of these Members include: Physics of low dimensional systems, Topological defects in fluids in restricted geometries, Critical phenomena in complex fluids and magnetic systems, Monte Carlo simulations and development of novel sampling techniques, Genomics and bioinformatics, Protein folding, Cognitive neuroscience, Computational intelligence, Natural language understanding, Very Large Scale Integration (VLSI), Quantum Chemistry and Density Functional Theory, Molecular Modelling, Drug Design and Delivery, Design of new materials, weather forecasting etc. Short term courses have been so far conducted in the areas of Parallel Computing, Monte Carlo Simulation and Molecular Modelling etc.

CMSD has been involved, over the past few years, in promoting and fostering multidisciplinary research programmes in *Advanced Computational Methods*, with focus on the core areas of Physics, Chemistry, Biology, Engineering Sciences and Computer Sciences, besides interest in related research areas like Finite Element Analysis as applied to Nanotechnology, Computational Fluid Dynamics, Ocean-atmosphere-climate Modelling, High-End-Visualization/Virtual Reality, Modelling and Simulation of large/complex Systems, etc.

Following are the facilities available at the Centre:

1. Data Centre: The Data Centre houses a HPC cluster with following configuration.

- HPC Cluster: 1680 CPU cores, achieving peak 120-Tflops speed, fully networked and consists of the following hardware: HPE Master Nodes (2), Computing Nodes(42), Storage Nodes(2) and SAN storage.

8.2. Central Instrumental Laboratory (CIL)

Holding the distinction of FIRST building to come up in the vast university campus in 1979, the Central Instruments Laboratory (CIL) is a centralized instruments facility with the state-of-the-art analytical equipment to cater to the research needs of Science/Engineering/ Medicine schools of the university. CIL has been playing a crucial role of providing the instrument's support to the research fraternity of the university. The list of instruments at CIL covers a broad range of research fields viz., microscopy, diffraction based (Spectrometers), thermal and magnetic property measurements. The lists of instruments are: 1. Scanning Electron Microscope (**SEM**) with Energy Dispersive Spectrometer (**EDAX**), 2. Confocal Microscope (**CFM**), 3. Powder X-Ray Diffractometer (**XRD**), 4. Vibrating Sample Magnetometer (**VSM**), 5. Electron Spin Resonance Spectrometer (**ESR**), 6. Differential Scanning Calorimeter (**DSC**), 7. Thermogravimeter-DTA (**TG-DTA**), 8. Circular Dichroism (**CD**) Spectrometer.

CIL offers educational visits to the participants of short/long term courses conducted at science schools of the university and the Academic Science College. The CIL staff has also been sharing their experiences in the academic program of the university by offering lectures in Analytical Instrumentation (Ph.D.), Environmental Studies (I.M.Sc.), Atmospheric Electricity (M.Sc.). The areas of specialization of the staff at the CIL include Mass Spectrometry (lab-based and space-borne), Radiation Spectroscopy (X-Ray, UV-VIS-IR), Microscopy, Advanced Electronics, Design and Development of Microprocessor and Microcontroller – based Systems, Embedded Systems, Instrumentation aspects of Planetary and Space Sciences.

8.3. Computer Centre

The Computer Centre was established in 1985 to facilitate, foster, and support the essential teaching and research goals of University of Hyderabad through the deployment and delivery of computing and communication services to the university's faculty, staff, and students. As part of teaching process, students have access to computers for their course or project work. Its facilities are also used in work related to administration such as recruitment, academic, examinations, finance etc. In 1993, ERNET selected University of Hyderabad to be one of the transit nodes for Internet connectivity with a narrow bandwidth of 9.6 Kbps. It was made operational through VSAT dish antennae. This transit node at the Computer Centre provided Email/Internet services to educational and research organizations in Andhra Pradesh such as IDRBT, NFC, DMRL etc. Further 128 Kbps microwave and 2 Mbps backbone links were established in the year 2000, 2001 respectively. UGC funds allocated in the year 2000, was utilized to increase the number of terminal points available to users. The UGC grant allocated in the year 2001 helped establish the 1 Gbps structured SM fiber optic network for the university. Further this expanded as a 2 Mbps point-to-point leased line between UOH and IDRBT, 2 Mbps UOH - Infosys (Hyderabad) – Bangalore leased line, and 128 Kbps ISDN line. In the year 2006, the bandwidth available to the university was enhanced to 4 Mbps. All residential buildings, hostels, and upcoming buildings were connected to the backbone network. Fourteen Wi-Fi towers were erected at different locations to create wireless hotspots. Consequently, the bandwidth was upgraded to 1 Gbps. A new email server was installed, and user authentication services were made operational.

With the expansion of the computing activities into different horizons the university distributed the staff at Computer Centre to various places such as A.I. Lab, CMSD, Campus Network Facility, Admin Computer Centre, F&A Computer Centre, Automated admission office, Centre for Integrated Studies at South Campus and other Schools/Centers to tap their inherent potential. The Centre is equipped with Pentium systems, Color and Black/White Laser printers, Cannon IR 2530 xerox cum printer, Scanners, CD writer. The Computer Centre has recently procured 75 Lenovo Desktops Core i5 as an upgraded facility for users. 10 Dell Desktops core i3 Systems with LINUX/Windows 8 operating system have been earmarked for training/workshops.

The Computer Centre has 7 surveillance cameras inside the Centre for monitoring purpose. The Centre has facilities for Programming, Word processing and execution of various other tasks in addition to Internet/E-mail that benefit users. The Center is open 24 hours except on holidays.

Training and Development Activities:

The Computer Centre has undertaken training for all sections of the University in Libre Office. It has decided to make use of open source software in the campus.

8.3.1 Campus Network Facility (CNF)

CNF is responsible for the management, operation and support of the campus network and coordinates the design, long-range planning and procurement of a broad range of network services and accessories. The campus network covers about 11,000 LAN ports. The Campus Network consists of high-speed connectivity over OFC backbone. The backbone spans to 40 distribution nodes and other Campus buildings. For easier management, the campus

network is made into more than 80 subnets divided into 8 segments covering all the administration, academic and hostels and campus quarters. It also presently has some wireless facility at public places.

Technology incubation is a potent element in the National Innovation System intended to foster Techno-entrepreneurship, innovation and /or translation of research into the market place or public sphere more systematically and comprehensively. The University of Hyderabad has a well established research culture. In order to foster the above and, in general create an ecosystem of innovation and entrepreneurship, the University has established three incubators supported by various Government bodies (TBI-DST, TIDE-MEITY, BioNEST-BIRAC/DBT). Of these, TBI is active from the year 2011, TIDE from year 2012 and BioNEST has started its operations in the year 2018.

With a view to streamlining the activities of Innovation and Entrepreneurship on the campus, the University, with the approval of its Executive Council, has set up a Unit named Technology, Industry Liaison, and Entrepreneurship (TIE-U). The Unit among others shall coordinate promotion of entrepreneurship, industry liaison and transfer of University developed intellectual property and knowledgebase to prospective clients including budding entrepreneurs. The unit in turn has set-up a not-for-profit Section-8 Company entitled "Association for Scientific Pursuits for Innovative Research Enterprises (ASPIRE)" under which all the incubation centres including BioNEST shall function. The Board of Directors of the company shall oversee the functioning of the incubation centres.

The Incubators encourage potential innovators, both from within and outside the University, to develop technology ideas into marketable products by offering Infrastructural facilities, seed funding and mentorship. The Infrastructural facilities include Space (both dedicated and plug and-play), Meeting rooms, well-equipped common laboratory facilities. Seed funding is offered subject to availability, after evaluation of ideas and team, usually as a soft loan initially with option to convert to equity. Laboratory facilities include both analytical and molecular biology related equipment in TBI and BioNEST. A prototyping lab for Electronics and IT related activities which include PCB prototyping, 3D printers, server and mechanical workshop, have been established.

So far all incubation centres at ASPIRE has incubated 40 start-ups at various stages (pre-incubation, incubation, and virtual incubation modes) in different thrust areas. Our incubatees had filed 10 patents during their incubation time at and raised more than Rs.2.00 crores funding from various funding agencies and angel investors and also received honours/awards from national and international agencies. Start-ups in all incubations centres are focusing completely on innovative product/ technology development.
